PRIORITY ISSUE 1

ACCELERATING ECONOMIC RECOVERY

✿ ✧ BACKGROUND

The pace of global **economic recovery** is expected to slow in the near term as recurring pandemic waves disrupt domestic activity, supply bottlenecks continue, and policy support is gradually withdrawn. At the same time, the recent emergence of the Omicron variant underscores how the further spread of COVID-19 and continued **uneven access** to vaccines could contribute to more persistence in the economic damage from the pandemic.

Global Economic Prospects

WORLD BANK GROUP

- 1) Unequal access to vaccines,
- 2) Hesitancy, and
- 3) Higher infectiousness

“As the world economy is still being affected by Covid-19, Indonesia highlighted the importance to strengthen global health architecture that adheres to the principles of solidarity, equality, justice, and transparency.”

(President Joko Widodo’s speech on First session of the G20 Summit on Oct. 30 in Rome, Italy)

- 1) Recurring pandemic waves disrupt domestic activity,
- 2) Supply bottlenecks continue, and
- 3) Policy support is gradually withdrawn
